

1. What is a Black hole? What do you know about them?

“Black holes are regions of space where gravity is so powerful even light cannot escape their grasp. They can form when stars many times more massive than the Sun burn out and collapse in on themselves.”

2. How do Black Holes look like?

3. Here are some artists' illustrations of black holes.

4. We are going to watch a short film called The Black Hole . However, the black hole in the film is not in space. According to the picture what do you think the film is about, what story it tells and what images they expect to see.

5. Watch the video and compare your answers with it.
